

WORKSKIFF

Tri-Hull C Series Model

This unique hull design has been used in the marine business for decades and is known for the ability to get on plane easy and be relatively stable at rest. Utilizing the tri-hull design, Workskiff added a generous flat bow work platform; spacious cockpit; and heavy-duty internal framing for heavy loads, towing applications and pushing capability. The Tri-Hull Series excels in calmer water conditions such as rivers, lakes and nearshore operations and is generally used for oil spill response, research, fisheries and general-purpose marine utility work. Clients who utilize the C Series include Disney World Epcot Center, the US Navy, NOAA, UC Davis and the City of Seattle. The C Series can be outfitted with a console, T-Top, or cabin.
